Lei Jun ( )

- **Positioning:** "People's Entrepreneur" | Super IP representing the entire Xiaomi ecosystem | Veteran tech figure utilizing New Media.

    - A monument in the Chinese tech industry. Graduated from Wuhan University, was one of the early engineers at Kingsoft, and rose to become its CEO before its successful IPO.

    - Before exploding on Douyin/TikTok, Lei Jun was already highly popular on Weibo and active on traditional media. However, his biggest Self-Media turning point came when preparing for the final startup project of his life: **Xiaomi SU7 electric vehicle** (2021-2024). He built a personal Douyin channel to directly interact and unlock the entire car manufacturing process for users.

- **Storytelling via Short Video & Livestreaming:**
    - **The Everyman Persona:** Unlike traditional, detached corporate executives, Lei Jun appears on Douyin in simple clothes, sharing his breakfast, biking to work, or showing his daily outfits. This narrows the gap between the billionaire and the average consumer.
    - **Self-deprecation:** When his English speech in India was turned into the viral mock song "Are you OK?", instead of suing or deleting it, he bought the song

rights and played it in Xiaomi Mi Home stores. Lei Jun turned a mocking meme into a powerful branding weapon to win public affection.
